How to Create Your Radford University Portfolium Account
All Radford University students and staff have access to a Portfolium account. Portfolium is a website designed to act as an electronic portfolio where you can store and showcase your projects.

1. Go to Portfolium.com. In the upper right-hand corner, next to the LOGIN button, select the “JOIN” button.

2. Enter your Radford University email address, which ends in @radford.edu. Then select continue.
3. You should receive a message indicating that you already have an account since you are affiliated with Radford University. The message should also direct you to check your email for a welcome message.

4. Go to your email to retrieve the welcome message. If an email does not appear, go back to Portfolium and select “RESEND WELCOME EMAIL.” From the email, select “ACCESS MY PORTFOLIUM.”
5. You should be redirected to the Portfolium webpage, where you can set a password. Once you’ve entered a password, read the terms of service and privacy policy, check that you agree, and select “CONTINUE WITH EMAIL.”

6. As a student, you should automatically have access to the Project Network. The next step is to affiliate with Radford University as your school, fill in your professional information, and add a professional photo. This can be accessed using the options on the right.
7. Here, you can add your professional image and information about yourself. Be sure to save your changes! Now you are all set up with a Portfolium account.
